

# Managing the moisture while sowing crops

□ Endure Agri Solutions directors Andrew Lorking (left) and Grant Forsdick discuss the working of the patented Moisture Manager seeding module with owners Ian and Trevor Shadbolt and Ian's son Liam at last week's demonstration day.

By **KEN WILSON**

ENDURE Agri Solutions, New South Wales, let its customers do the talking at a demonstration of its Moisture Manager held near Mukinbudin last week.

Local farmers Liam, Trevor and Ian Shadbolt hosted the demonstration on their north Mukinbudin farm establishing a 16ha trial to compare the Moisture Manager's "moisture-seeking" knife and Baker

Boot with a conventional knife system.

According to Trevor Shadbolt, extensive research three years ago unearthed the Moisture Manager in NSW and the brothers agreed it was the type of seeding bar that suited their needs.

"This is our third season with the bar and we're very happy with its performance," he said.
